

Function

SAFM serial fully automatic laminator is designed for thermal film lamination. This laminator is composed of feeding unit, laminating unit and paper separation unit and paper collection system. The electric and pneumatic system is equipped with programmable control (PLC). Heating roll adopts built-in oil heating system to precisionize laminating temperature. This machine centralizes the features of compact structure, high automatization, humanized operation design, and is an excellent choice for large and medium -size enterprises.

Main Specification

| Model | SAFM-800 | SAFM-1100 |
|----------------------------|-------------------------|-------------------------|
| Max Paper Size | 780X1040mm | 1040X780mm |
| Min Paper Size | 350X300mm | 350X440mm |
| Paper Thickness | 125-500g/m ² | 125-500g/m ² |
| Max Laminating Speed | 40m/min | 40m/min |
| Gross power | 22kw | 22kw |
| Total Weight | 1600kg | 1600kg |
| Overall Dimensions (LxWxH) | 4800X1850X1700mm | 4800X1850X1700mm |
